

MakerGear M2 3D printer

The US manufactured M2 is the 3rd generation of Makergear's 3D printers. This machine comes equipped with a heated platform which uses PLA or ABS to build objects of a maximum dimensions of 203 x 254 x 203 mm.

Technology: FDM

Layer Resolution: 25 Microns

What is included

- ▶ 1 year product warranty
- ▶ Free online troubleshooting and problem resolution
- ▶ Free tutorials in a DVD
- ▶ Free demo & initial set up
- ▶ Few print-ready STL designs in USB stick

Specifications

Overview

Weight: 17.00 KGS
Assembled: Yes
Dimensions: 558 X 482 X 508 mm
Power Requirements: 220V / 110V
Build Volume : 203 x 254 x 203 mm
Filament Diameter: 1.75 mm

Software & Connectivity

Bundled Software: Simplify3D
Supported File Types: STL, SLC
Supported OS: MAC, WINDOWS, Linux
Connectivity : Ethernet, USB

Printing

Supported Filament: ABS, PLA, PET, Flexible
Layer Resolution : 25 Microns
XY Positioning Precision: 100 Microns
Z Positioning Precision: 25 Microns
Print Technology : FDM
