think3D™

India's largest integrated
3D Printing service provider

3D Printing · Machining · Molding

www.think3d.in

ABOUT THE FACILITY

think3D has set up India's largest integrated 3D Printing facility in Vizag, Andhra Pradesh to serve the rapid prototyping & batch production needs of medical technology & defence industries across India. The state of art facility spans a total floor area of 20,000 sft and is equipped with both additive and subtractive manufacturing equipment to serve the varied needs of aerospace, defence, automotive & medical industries.

SERVICES OFFERED

3D PRINTING — We have industrial 3D Printing machines in-house to offer entire gamut of 3D Printing services ranging from metals to plastics. Our inhouse technologies include FDM, SLA, DLP, SLS, MJP, CJP, PJP, MJF, DMLS

3D DESIGNING — With best-in-class 3D modeling softwares and an expert in-house 3D Design team, we offer high quality CAD modeling & organic modeling services using softwares like SolidWorks, UniGraphics, Maya, ZBrush, Ansys

3D SCANNING — High quality RE, Dimension Inspection, CMM services with state of art equipment from reputed manufacturers across the world like Artec, Hexagon, Solutionx, Shining3D

MACHINING — We also offer CNC & EDM Machining services to our customers. We have 2 CNC Machines (3-Axis & 5-Axis), 2 EDM machines (W-EDM, Die Sink) & many more conventional machines to serve the machining needs of customers.

MOLDING — At think3D, we also offer injection molding & vacuum casting services to our customers for their batch production needs. We have two injection molding machines and one vaccum casting machine from Renishaw.

POST PROCESING — Various post processing services like vacuum heat treatment, machining, shot blasting, sanding, spray painting will be offered inhouse to give the best quality finish to customers.
